

Bridging the gap between human loading and mechanical test methods

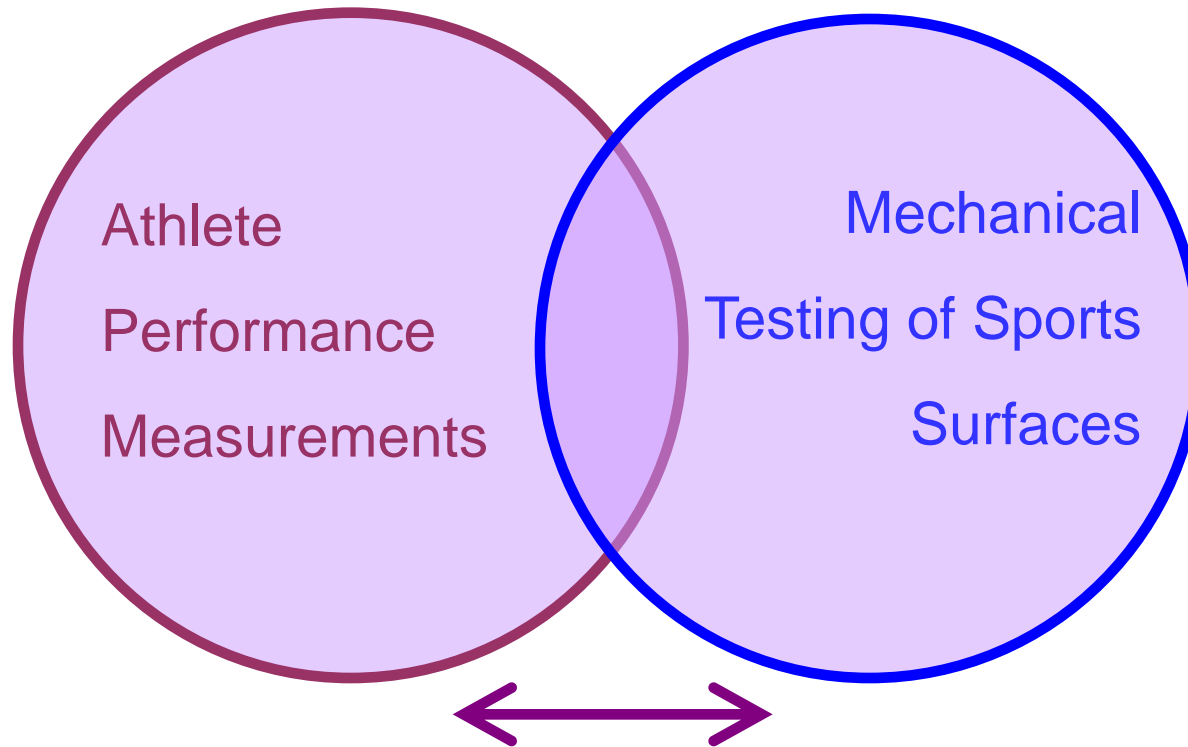

Drs Matt Carré & Sharon Dixon

University of Sheffield

15 June 2011

Bridging the Gap...

How can we combine both approaches for more effective understanding of the problem?

Today's activities

- Session 1 – Measurement of human movement and loading
- Session 2 – Keynote: Player-surface interaction on turf – FIFA research to date
- Session 3 – Surface properties: Mechanical and human testing
- Session 4 – Discussion forum

Discussion Forum

- How do we effectively bridge the gap???
 - What can we learn from past collaborative projects?
 - What do biomechanists want?
 - What do test designers need?
 - What does industry / test houses require?
 - What do governing bodies require?
- Where do you we go next?
- How can SportSURF help?
